Summary

Backend developer with 1.5 years of experience building REST APIs and scalable services in Python and Django. Comfortable across the stack from database design to deployment.

Skills

Python, Django, Django REST Framework, MySQL, PostgreSQL, REST API, Git, Docker, Redis, Celery, AWS EC2, Linux

Experience

Junior Backend Developer, CodeCraft Pvt Ltd — Jul 2023 to Present

- Designed and maintained microservices in Django serving over 15,000 daily API requests.
- Implemented JWT-based authentication and role-based access control across services.
- Deployed and monitored applications on AWS EC2 using Docker containers.

Backend Developer Intern, TechNova Solutions — Jan 2023 to Jun 2023

- Built REST APIs using Django REST Framework for an internal inventory system.
- Optimized MySQL queries and added indexing, cutting average response time by 40%.
- Integrated Celery with Redis for asynchronous email and report-generation tasks.

Projects

E-commerce API Platform — Django, DRF, PostgreSQL, Stripe API — Designed a multi-vendor REST backend with cart, checkout and payment webhooks.

Task Management System — Django, Celery, Redis — Built a Kanban-style task tracker with background reminder emails.

Education

B.Tech in Computer Science, Savitribai Phule Pune University — 2023, CGPA 8.4/10

Certifications

- AWS Certified Cloud Practitioner (2023)
