Summary

Recent Data Science graduate with internship experience building classification models and dashboards in Python. Eager to apply statistical and ML fundamentals to real business problems.

Skills

Python, Pandas, NumPy, Scikit-learn, Machine Learning, Data Visualization, Matplotlib, Seaborn, SQL, Jupyter

Experience

Data Science Intern, Insightify Analytics — Feb 2024 to Apr 2024

- Built a customer-churn classification model achieving 88% accuracy with scikit-learn.
- Performed exploratory data analysis on transactional data for a retail client.
- Created interactive dashboards using Matplotlib and Seaborn for stakeholder reviews.

Projects

House Price Prediction Model — Python, Scikit-learn, Pandas — Regression model with feature engineering, RMSE improved 18%.

Customer Segmentation — Python, K-Means Clustering — Segmented 5,000+ customers into actionable marketing groups.

Education

B.Sc. in Data Science, Gujarat University — 2024, CGPA 8.1/10

Certifications

- IBM Data Science Professional Certificate
