## Summary

DevOps engineer with 3 years of experience automating CI/CD pipelines and managing containerized infrastructure on AWS. Passionate about reliability and reducing deployment friction.

## Skills

AWS, Docker, Kubernetes, Jenkins, CI/CD, Linux, Terraform, Git, Bash Scripting, Ansible, Monitoring

## Experience

### DevOps Engineer, CloudSprint Technologies — Jul 2021 to Present

- Managed CI/CD pipelines in Jenkins for 12+ microservices, cutting deployment time by 60%.
- Containerized legacy applications with Docker and orchestrated them on Kubernetes.
- Automated infrastructure provisioning on AWS using Terraform and Ansible playbooks.

## Projects

**Automated CI/CD Pipeline** — Jenkins, Docker, Kubernetes — End-to-end pipeline from commit to production with automated rollback.

**Infrastructure as Code Setup** — Terraform, Ansible, AWS — Reproducible multi-environment infrastructure defined entirely in code.

## Education

B.Tech in Computer Science, Osmania University — 2021, CGPA 8.6/10

## Certifications

- AWS Certified DevOps Engineer — Professional
- Certified Kubernetes Administrator (CKA)
